

Key Stage 1 E-safety

Helping children to understand and give some simple examples about how they can stay safe online.

This activity has been put together for you to share with your child/ren to encourage them to think about the things they can do to stay safe online. They will be familiar with some of the advice, questions and things to think about but repetition of this vital safeguarding is the key to it being successful.

Please feel free to approach this task in a way that is suited to your child/ren. You may wish to create a poster together that could be displayed at home to remind them about staying safe online and what they can do if they are unsure about something.

Questions to ask during the activity:

What device(s) do you like to use at home/school?

What do you like to do on your device(s)?

What things make you happy when you use technology?

What things make you unhappy/angry/sad when you use technology?

Why do you think we have rules for using technology and the internet?

Who decides the rules for how you use technology?

Why do you think we have these rules?

Are the rules you have fair or unfair? Why?

Can you think of any new rules for being safe/healthy when using technology?

Activity

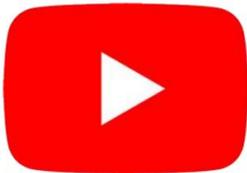

Show the starter sentence cards for different online/tech activities and uses. Explain that you are going to say some things that someone can/can't do with technology. For each one, they should tell you if it is a rule they have been told for using tech (e.g. at home/school/etc). Alternatively you could ask the children to perform an action to show their answer e.g. put their finger on their nose for 'yes' and hands on hips for 'no'.)

Read out a starter sentence card and add your own rule to the sentence e.g. 'When I play a video game...a grown up always plays with me.' Alternate between the cards to provide a variety of rules. Depending on the ability of the children, ask them to complete the sentence with a rule of their own. E.g. 'I have to ask a grown up if I want to...'

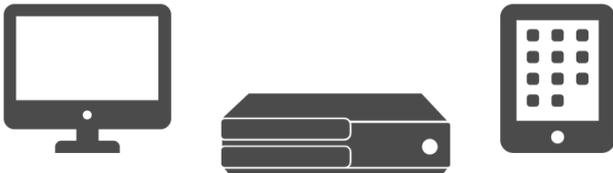

When I play a video game...

When I watch YouTube...

When I want to go on
the computer/console/tablet/phone...

I can play/watch for...

I am allowed to...

I am not allowed to...

I have to ask a grown up if
I want to...

A grown up who can
help me is...

If I get stuck...
